Autumn Sage

Common Name: Autumn Sage
Botanical Name: *Salvia greggii*
Category: Native Perennial shrub
Blooms: May-November, broad range of colors
Foliage: Has a pleasant, spicy scent
Height: 3 feet
Width: 3 feet
Light: Full sun to partial shade
Water: Once established, survives on existing rainfall
Propagation: From cuttings taken during growing season

Notes: Great landscape plant, use in containers, mass plantings or borders. Low maintenance. Can periodically shear to remove old flower stems; requires light application of fertilizer; water during dry spells.
