

Red Bird Plant, Devil's Backbone

Botanical Name: Pedilanthus

Type: Houseplant, leafy shrub known by its zig-zag stem

Height: about 2 ft. long

Light: bright light, with two or three hours of direct sunlight every day

Moisture: water sparingly, just enough to make the potting mixture moist.

Soil: extra coarse sand or perlite for drainage

Blooms: tiny red, bird shaped blooms that are borne in summer

Use liquid fertilizer once a month
