

# Texas Lilac Vitex

**Botanical Name:** Vitex agnus-castus

**Type:** Small flowering tree

**Height:** 10-15 feet

**Light:** Full sun

**Moisture:** Drought tolerant once established

**Soil:** Adapts to most soils

**Blooms:** Large, fragrant, lavender spikes

Dead head flower spikes to stop seed pods from forming and to encourage reblooming.

Should be cut back severely each year.

Attracts butterflies.
